

Mohammed Meraj Bin Nur

Junior Penetration Tester · Graphic Designer · Software Engineering Student

merajman21@gmail.com — Dhaka, Bangladesh — [linkedin.com/in/haxorfalcon](https://www.linkedin.com/in/haxorfalcon) — github.com/haxorfalcon

Professional Summary

Security practitioner and visual communicator: I conduct web application penetration testing and vulnerability assessments by day, and translate complex findings into compelling client-facing visuals by design. With nearly 3 years of professional pentesting at a security agency alongside freelance graphic design for 20+ clients, I bring a rare combination of offensive security depth and creative communication skills. Currently pursuing a BSc in Software Engineering at Daffodil International University, reinforcing secure development practices behind every engagement.

Skills

Penetration Testing	Web Application Security, Vulnerability Assessment, Manual & Automated Testing, Logic Flaw Analysis
Security Tools	Burp Suite, Nmap, Metasploit, Wireshark, OWASP ZAP, Nessus
Intelligence	Open-Source Intelligence (OSINT), Cyber Threat Intelligence (CTI), Reconnaissance, Threat Mapping
Graphic Design	Adobe Photoshop, Illustrator, Figma, UI/UX Prototyping, Brand Identity, Security Report Design
Development	Secure Software Architecture, Python, Bash, JavaScript, HTML/CSS, Git

Work Experience

Junior Penetration Tester

March 2022 – December 2024

Elegant Agency

Dhaka, Bangladesh

- Conducted web application penetration testing across 30+ client platforms, identifying and remediating critical vulnerabilities that reduced client attack surface by 60%.
- Managed end-to-end deployment security for all staging-to-production transitions, eliminating configuration-related vulnerabilities and cutting post-release security defects by 40%.
- Identified logic-layer bypasses and authentication misconfigurations that automated scanners consistently missed, directly preventing several high-severity exploitable entry points.
- Collaborated with development teams to integrate security into the SDLC, establishing hardening standards that reduced recurring vulnerability patterns across managed projects.

Freelance Graphic Designer

2020 – Present

Independent (Remote)

- Delivered brand identities, UI/UX wireframes, and digital assets for 20+ clients across tech and e-commerce sectors, maintaining a 100% on-time delivery record.
- Designed security report templates and vulnerability visualisations that improved stakeholder comprehension and accelerated client sign-off by reducing revision cycles by 35%.
- Produced UI mockups for security-focused web applications, bridging the gap between technical findings and executive-level communication.

CTF Competitor & Independent Security Researcher

2021 – Present

Independent

- Competed in national and international Capture the Flag (CTF) competitions, developing practical skills in web exploitation, reverse engineering, and cryptography.
- Researched emerging threat actor TTPs and translated findings into internal testing methodologies that directly improved assessment quality at Elegant Agency.

Education

Bachelor of Science in Software Engineering

Expected August 2029

Daffodil International University (DIU)

Dhaka, Bangladesh

Certifications & Awards

- Fundamentals of Open-Source Intelligence (OSINT)** – Certified Practitioner
- President's Scout Award** – Highest national scouting honour; awarded for demonstrated leadership, technical excellence, and sustained community service
